Cornerstone Credit Services, LLC

Cornerstone Credit Services understands the many demands facing chiropractic healthcare providers. From recruiting and retaining quality employees to managing billing and collections, your attention is constantly pulled in different directions.

For more than 25 years, Cornerstone has proudly served Alaska's chiropractic community. As an employee-owned company, every member of our team has a personal stake in the quality of our work and the success of our clients. That shared ownership strengthens our commitment to accountability, responsive service, and consistently high standards.

We help practices recover past-due receivables and make patient payments easier. Our credit card processing solution integrates with most EMRs and EHRs through our Practice Management Bridge and includes an online payment portal, text payments, recurring billing, and a secure card vault. Our approach improves cash flow, reduces administrative demands, and strengthens the financial health of your practice giving you more time to focus on what matters most: your patients.

Call us at **907-770-8100 in Anchorage**, or **1-877-375-8100 within Alaska** to find out more.

EVERY CHIROPRACTOR HAS THIS PATIENT.

The patient who desperately wants to heal.

THE STORY BEHIND NERI™

After years of searching for healing, Dr. Anna Altair discovered Dr. Carl Ferreri's work in Neural Organization Technique and, over the course of her practice, expanded it to NERI.

She began asking: "Why do some patients fail to fully heal despite excellent care?" This question led to the development of Neural Emotional Reflex Integration™ and a deeper understanding of how unresolved survival patterns can interfere with healing. NERI™ was created to help chiropractors address not only the spine, but the innate reflexes, emotional hooks, and nervous system as a whole.

IDEAL FOR PATIENTS EXPERIENCING:

- ✓ Chronic Pain
- ✓ Trauma Histories
- ✓ Anxiety & Hypervigilance
- ✓ PTSD
- ✓ Recurrent Symptoms
- ✓ Patients Who Plateau
- ✓ Adjustments That Don't Hold

CERTIFICATION INCLUDES:

- ✓ 12 Hours Training
- ✓ Practitioner Workbook
- ✓ Video Library
- ✓ Self-Paced Learning
- ✓ Testing Included
- ✓ Certification
- ✓ CE Approval In Process

WHY ALASKA?

Alaska communities experience high levels of:

- Trauma exposure
- Military and First Responder stress
- Chronic stress patterns
- Limited behavioral health access

Chiropractors are uniquely positioned to become leaders in nervous system-centered care.

Dr. Anna Altair, DC
Chiropractor | Creator of Neural Emotional Reflex Integration | Nervous System Educator

After decades of clinical observation and study, Dr. Altair developed NERI to help chiropractors address the neurological patterns that may interfere with lasting healing outcomes.

Our Services: • Chiropractic & PT equipment repair, preventive maintenance & calibrations, upholstery & table restoration, equipment sales & installation, and equipment purchasing & trade-ins.

We are committed to providing reliable service, practical solutions, and honest communication that help healthcare providers focus on patient care.

Neural Emotional Reflex Integration™

Web: www.yourownuniversity.com/NERI

Dr. Anna Altair, DC | (907) 354-1818
Chiropractor, Nervous System Educator, Creator of Neural Emotional Reflex Integration™

Neural Emotional Reflex Integration™ (N.E.R.I.) is an innovative educational model designed to help chiropractors better understand the neurological stress patterns that may interfere with lasting healing outcomes. NERI explores retained reflexes, chronic stress responses, emotional survival patterns, and nervous system integration strategies that may influence patient adaptation, resilience, adjustment retention, and overall clinical progress.

Participants learn practical assessment methods and integration techniques that can be immediately incorporated into practice to support more sustainable patient outcomes and a deeper understanding of the relationship between the nervous system, emotional stress, and healing. For many practitioners, N.E.R.I. provides a new lens through which to understand chronic presentations, recurring patterns, and why some patients struggle to maintain progress despite appropriate care.
